1991 Chevrolet K1500 Sport Z71 RESTOMOD LSx (BLACK JACK II)

This Chevy Pickup Truck I have bought in USA when I was living in Clinton, Connecticut during the 90s.

1994 The Engine was upgraded from EFI to TPI Fuel System.

1995 The Chevy was exported to Germany when I moved to Karlsruhe.

1998 The Engine was replaced with a 5.7L V8 (LT1) from a 1993 Corvette C4. The Interior was also upgraded with Standard Version Power Leather Seats which usually had been installed in 1994-96er Corvettes.

Since Dezember 2020 the Chevy Pickup is in the progress of a Restomod Conversion and is not yet finished. The shown photos are related to the time before starting the Restomod Conversion.

Future goal is also to present this Chevy with a Cover Story on the LMC Truck Catalog for GMT400 Pickups, especially since this Restomod Conversion is very rare, as the Chevy has a 4x4 Drivetrain (K1500). You will be able to see this Chevy on various US-Car Meetings in Germany, Austria, Switzerland, Liechtenstein, Netherlands and France as soon as the LSx Truck has been finished ;-)

Following listed are some parts we intend to use for the Restomod Transformation. The selection is subject to change!

Regular Cab/Standard Bed (6.5ft.)

Axle Ratio: 3.42:1 (GU6) 10 Bolt, 30 Spline

Exterior Color: Onyx Black (W-L8555, U8555, D47)

BODY

	Hood SS-Series (Cervinis) Fiberglass, black painted (requires Hood Pins!) MaxxTech # CK-11111
	Hood Pins QL-38 (Quik Latch) Aluminum (matte-black anodized) MaxxTech # 4A-11111
